KINGS OF LIVING

A grand and high-stepping monarch was old Louis XIV—they still talk about him back in his old home town. Nothing was too good for Louis-in fact, the best wasn't quite good enough.

Yet his magnificent palace had neither gas nor electricity and there wasn't a tiled shower-bath in the place.

Today the average Canadian citizen enjoys conveniences and comforts exceeding Louis XIV's most extravagent dreams. And many things which we regard as absolute necessities would have seemed the most elegant luxuries to Louis,

Advertising has made possible this widespread distribution of the good things of life. Advertising has made possible large-scale production and large-scale selling, resulting in prices that take luxuries out of the "for-kings-only" class.

It is well worth your while to read the advertise-ments. They are largely responsible for the high standard of living enjoyed in this country today. And they are raising it daily, making us kings of comfort -kings for Louis to envy.
